2<sup>nd</sup> Quarter 2007

Volume 5, Number 2

Dedicated to Supplying the Best Interiors for All Types of Vans and Work Vehicles

## Free Freight Program Extended for Distributors of System Edstrom

Freight can be a costly addition to the price of anything we buy today. This is, in part, because the cost of fuel has risen to record highs. System Edstrom feels your pain, and we are extending our Spring Nationwide Freight Program. It's a simple way to reduce your freight cost to \$0.

Give us a call at (877) 538-9100 to find out how buying work truck interiors from System Edstrom can be a little easier, and ease your pain.

## Order-to-Shipment Response Time an Edstrom Strength

How long did it take you to have your last order shipped from your van interior supplier? A recent internal study by System Edstrom's Customer Service Department showed that our average shipped order was packed and shipped within 22 hours from the time it was received. Over 83% of the orders were shipped the same day received.

Kudos go to the SE Shipping and Customer Service Departments for making this happen, day in and day out.

So, next time you have a hot work vehicle interior order (or any interior order for that matter), buy System Edstrom first.

In a rush? Call us: 1 (877) 538-9100.

## New 2007 Sprinter Bulkheads and Extension Kits Available

Bulkhead door slides open easily for movement to and from cab and cargo area. What better way to increase efficiency and save time.

When closed, System Edstrom's Sliding Door Bulkhead rides quietly on lifetime nylon slide pads, and is virtually rattle free.

By adding System Edstrom's Bulkhead Extension Kit, the driver's and passenger's area is extended by 5", increasing space for seat adjustment and seat back inclination.

The new 2007 Sprinters are on dealers' lots, and System Edstrom is shipping our new Sprinter Bulkheads (F8807) as fast as we can load them. Our new Sliding Door Bulkhead is redesigned for the new Sprinter, and will fit all 2007 Sprinter models, including those with optional dual sliding doors. Even the Mega Top model can use our Bulkhead.

The System Edstrom Sliding Door Bulkhead comes with a 2 way accessible door that glides on the same indestructible lifetime nylon pads as our standard drawer slides. Because the bulkhead's door slides open and closed, instead of swinging, items sitting on the floor do not interfere with the door's function. The sliding door also allows shelving, drawers, and cabinets to be mounted up closer to the door edge, increasing the amount of storage area in the vehicle.

While the new Sprinter is designed with a larger driver seating area than the original version, System Edstrom continues to offer our Bulkhead Extension Kit (F8811). Simple to install along with the F8807 Sliding Door Bulkhead, the Extension Kit increases the cab area by 5" over normal bulkhead fitted cabs. So, for the extra big drivers or those just wanting to lean the seat back a little more and stretch out a bit, System Edstrom's Bulkhead Extension Kit is a must! Thinking about a new Sprinter, or have customers buying them? Place your orders now for System Edstrom's Sliding Door Bulkhead. Our complete bulkhead product line is in your stock for immediate delivery.

## Cab Mounted Organizer Available for NPR/NQR and W-Series

Do you have customers driving Isuzu NPR/NQR trucks who have a need for a little more organization in the cabs? System Edstrom offers the 5066B Tandem File Holder for that purpose. The extra slim design of this vertical 10 pocket document organizer allows it to neatly fit the area between the driver's and passenger's seats and against the back wall of the cab, utilizing an area not normal used.

Sturdily constructed of steel, the 5066B features rolled edges on all surfaces exposed to the driver when retrieving or inserting documents, and is powder coated in a hammerite grey finish to match the cab's interior. The 5066B includes all necessary brackets and mounting hardware to mount securely to the interior. The item is also available as the 5066, less mounting brackets, for installation against a solid bulkhead as in a step van, on a shop wall, or other self-supporting surface.

The dimensions of the 5066 and 5066B Tandem File Holders are: 24" W x 32" H x 3" D. The mounting flanges add approximately 1" per side. Contact System Edstrom for more information.
